Protected fuels under softwood canopy and deep duff layers continue to smolder and creep on the northern portion of the fire. Effects of long term drought remain despite recent precipitation and cooler temperatures. Drought Codes remain in the Very High range. Crews continued repair efforts in the north from DP-3 to the Tanana River implementing measures to protect water quality of anadromomous fish habitat and actions to mitigate infestation by Spruce Engraver beetle. Remaining resource will complete the closeout of Division F and facilitate the delivery of seed and fertilizer during the next operational period. All crews and overhead returned to ICP for demob prior to end of shift.

Transfer of command to a Type 3 IC at the home unit is scheduled for 8/26 at 06:00 hrs.

## Assigned Crews:

Holy Cross	Type 2
